DOMUS Classic

DOMUS Classic

The desire to discover new emotions and explore the future, reading our past, but, at the same time, expressing the present, is the essence of the new DOMUS Classic collection.

During its short history, DOMUS Line has been able to keep alive the passion for challenge, with the continuous search for the new poetry of functionality.

And therefore, following our instinct, the DOMUS Classic collection was born, an innovative product between art and design, between a limited series and high volume, between craftsmanship and industrial production.

The added value, and at the same time distinctive, to this collection is a new experience, where craftsmanship is projected into the future and the know-how is combined with the highest technology content.

DOMUS Classic combines industry expertise, craftsmanship, and new technologies. Experts in metal alloy die casting as well as competent connoisseurs of shapes and finishes, typical of the tradition of Classic furniture.

The development of each decorative ring mould of the DOMUS Classic collection has been perfected by the expert hands of skilled decorators, thus making shapes and details unique and exclusive.

The production is carried out in strict accordance with the steps that ensure excellent quality levels.

Each device is subject to surface treatment processes that create refined aesthetic details of the ring and the perception of the old and aged by time.

The shapes of ACANTHUS, AKOYA, and PASSEPARTOUT are the result of a deep preliminary study of Classic Furniture. These devices combine, for the first time, the rationality of LED technology with shapes and designs inspired by nature, such as elegant acanthus leaves and precious Japanese akoya pearls.

Forms are combined with colours and shades inspired by the most precious and noble metals, such as gold, silver and bronze. The finishes are dressed in the distinctive and sophisticated tones of the Classic traditional style, such as antique pewter, antique gold, oriental silver, antique silver, and antique bronze.

Spotlights ACANTHUS, AKOYA, and PASSEPARTOUT combine, in the same product, the result of the best Italian artisan talent with the most innovative LED technology solutions, for a device that is unique on the market.

DOMUS Classic, with its elegant and refined shapes, has a highly technological heart, born from the experience and know-how of the DOMUS Line research team.

Akoya

Akoya

AKOYA is a LED spotlight in metal alloy available in four different finishes: antique gold, antique bronze, antique pewter, and brown. The decoration of this spotlight, simple and elegant, with the beading enveloping its edge, is inspired by the finest Akoya pearls, harvested in Japan but known for their beauty and perfection all over the world.

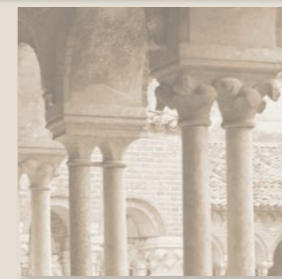

Akoya

Acanthus

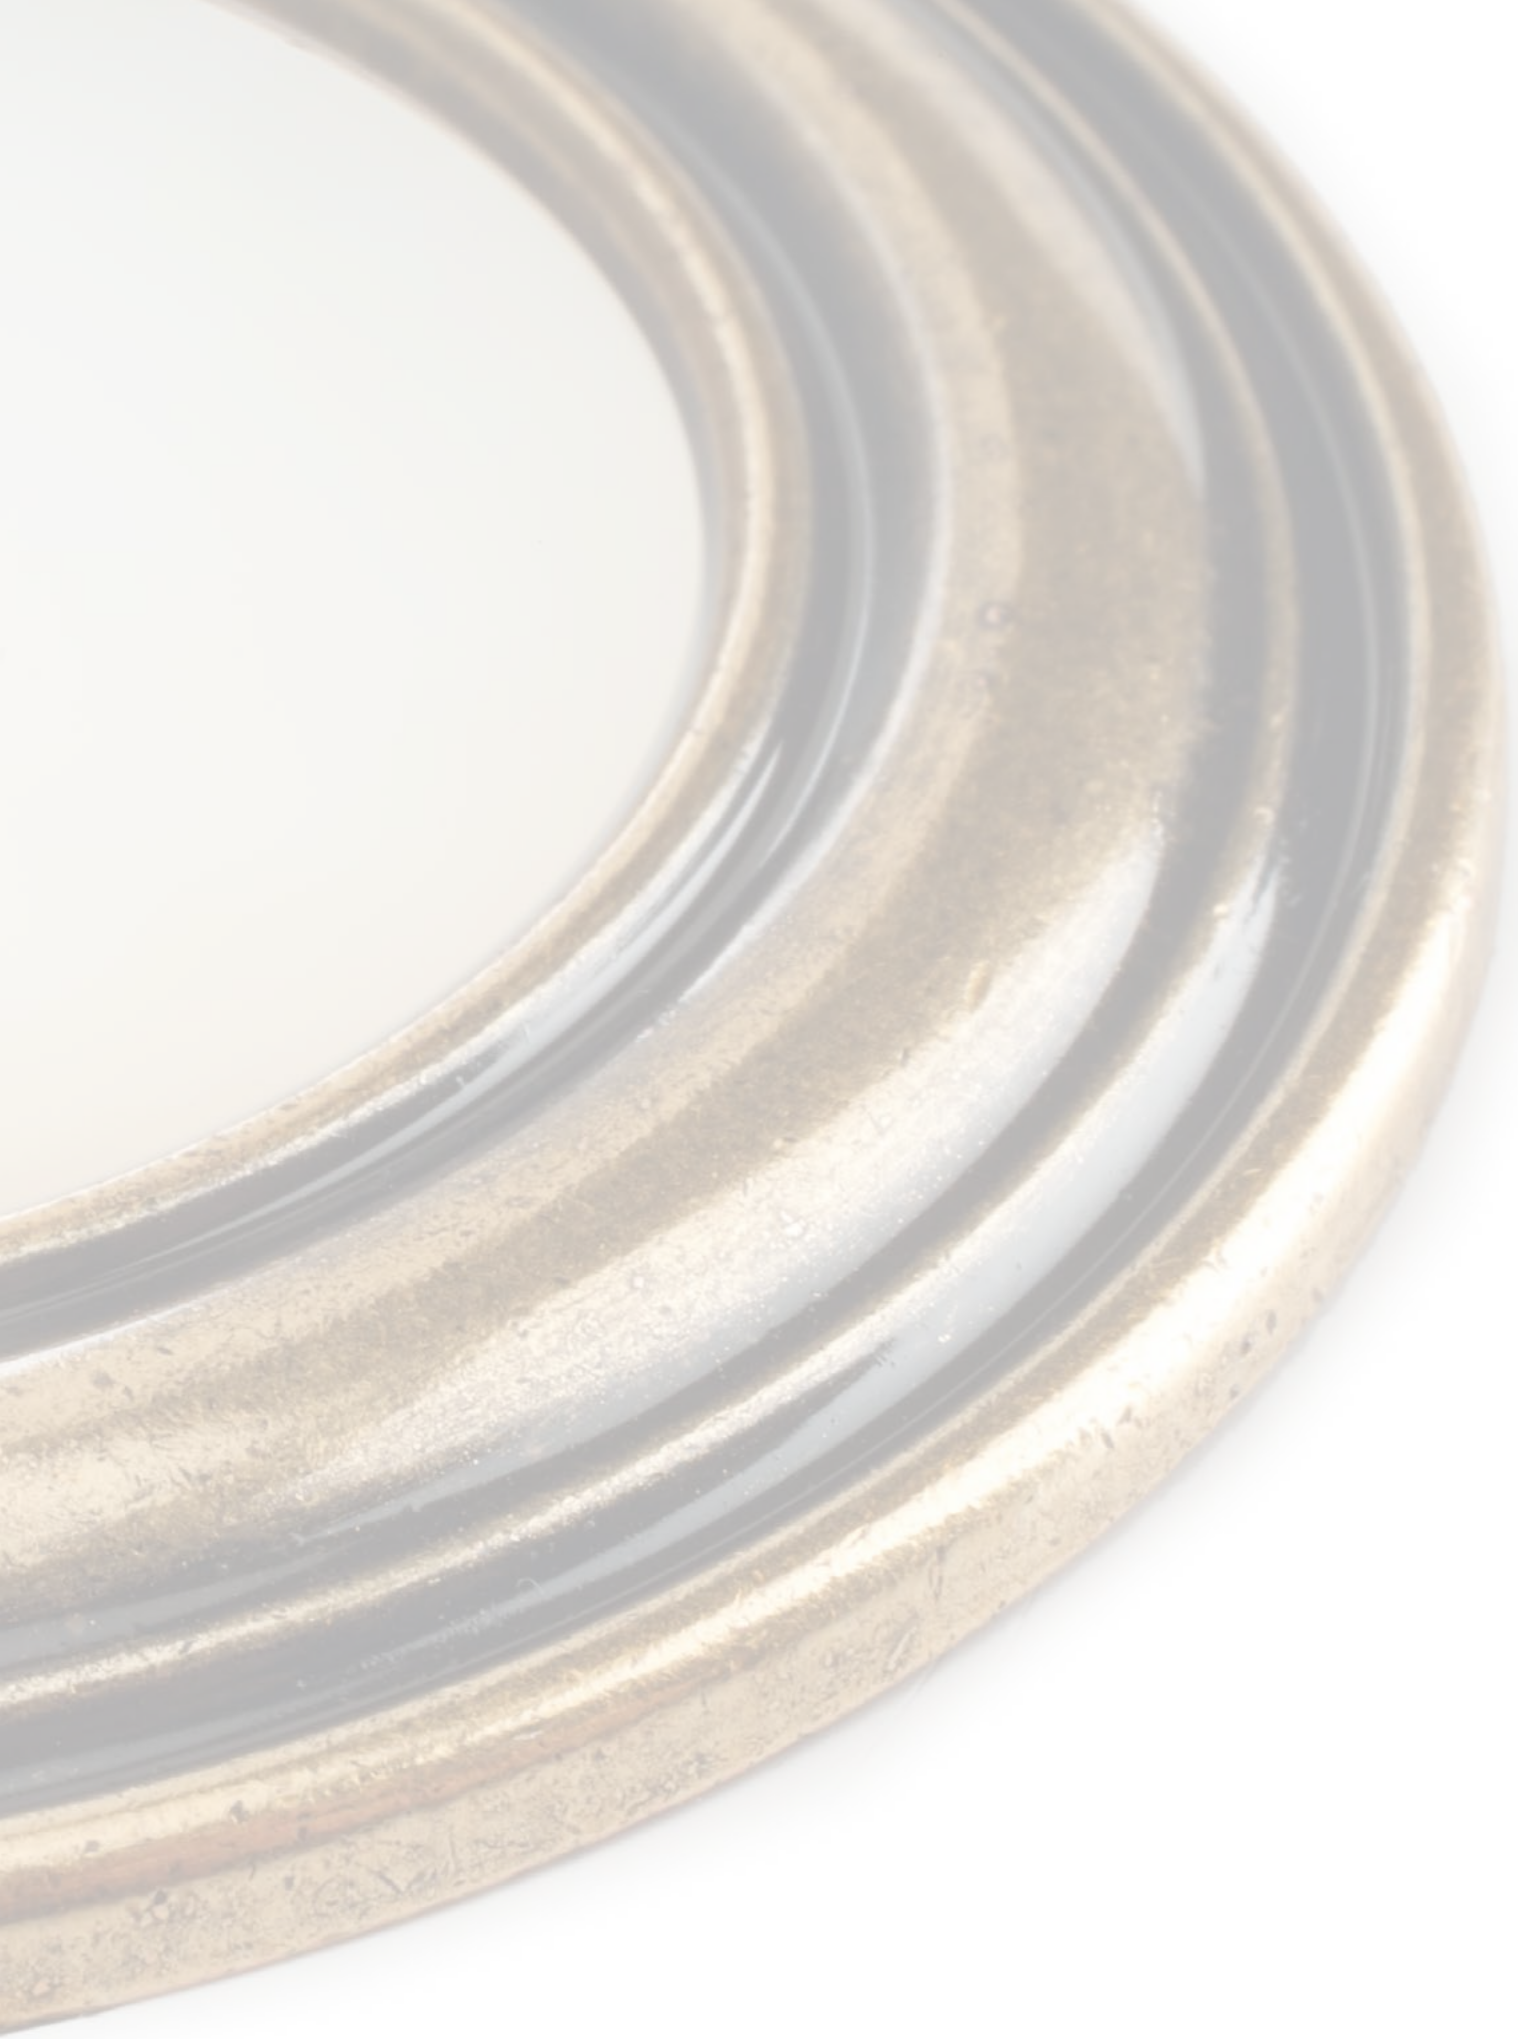

Acanthus

ACANTHUS is a LED spotlight in metal alloy available in four different finishes: antique gold, oriental silver, antique bronze, and antique silver. ACANTHUS is inspired by typical elements of classical Greek and Roman architecture, with the elegant acanthus leaves richly decorative.

Acanthus

Passepartout

Passepartout

PASSEPARTOUT is a LED spotlight in metal alloy available in four different finishes: antique gold, antique pewter, antique bronze, and brown. PASSEPARTOUT has an extremely simple decor that plays on the succession of grooves and reliefs, of light and shade. Its shape makes it suitable for application in a variety of contexts, from classic kitchens to contemporary living rooms.

The collection of devices DOMUS Classic incorporates the new LED COB (Chip-On-Board) technology.

This innovative configuration of the LEDs provides a homogeneous projection of the light, diffused and without the speckled effect, typical of traditional spotlights. Each model is also equipped with a special lens that appears neutral and uniform even when the device is off.

The flush mounting for a 68mm disc with a depth of only 12mm is carried out by a functional pressure fixing system and stainless steel springs.

TECHNICAL DATA

Power supply:	12Vdc
Wattage:	3,4 W
Wiring:	2000mm
Connector:	Miniplug
Installation:	recessed

PHOTOMETRIC DATA

Colour appearance:	warm white *
Temperature colour:	3000K
Luminous flux:	210 lm
Luminous efficiency:	62 lm/W
CRI:	Ra > 80
Illuminance:	380 Lux at 50cm 840 Lux at 30cm

* on request also available natural white

Device with non-replaceable LED module

Energy efficiency class: A++, A+, A
