

## TREND

# Modern waste sorting

TREND was developed to meet the demands from the kitchen industry to offer a waste system that could fit a wide range of kitchen designs. All with the newest generation of thin drawers. So we put a lot of effort in to produce a waste solution that is compatible with our newest line of bins. And that has a design that makes it easy to integrate in many kitchen types.

This solution suites many different kinds of kitchens but does the same job. It offers smart, modern, available waste sorting for homes in the 21st century that want to recycle their waste in a convenient way.

TREND 400

TREND 600

TREND 800

TREND LEG\*

\*The leg can be used as a complement to TREND if you want to put it in a larger drawer.
