

HIDE

For premium kitchens

We worked hard to create a waste system that would feel and look like a million bucks. We wanted to show that sorting and taking care of waste can be done in a convenient way without compromising the aesthetic design in a premium kitchen. HIDE is a revolutionary and modern waste system that truly makes storing and recycling beautiful. It's developed to fit a new generation of drawers that is optimized with straight, thin lines. It is flexible and has a flip open cover in steel sheet that makes it neat and extremely easy to keep clean.

We offer all our customers the range of HIDE that fit their specific needs. Choose between three colours, five sizes and multiple variants of bin set ups. On the next page you can see examples of HIDE as an inspiration and guide.
