

## Supporting technology on the move

Wireless communications allow us to be at our desk in the office no matter where we are in the world. Laptops, although compact and lightweight, can pose a serious risk to a users' long term health. The close position of the screen and keyboard forces a hunched posture which means frequent laptop users can experience serious back and neck pain. Employers have an obligation to provide laptop users with the ergonomic accessories necessary to enable safe working. The Colebrook Bosson Saunders range of laptop stands and mobile workstations can be set to correct your posture, meaning that wherever you work, you do it in comfort.

Lapjack is the perfect stand for laptop users on the move. Made from a strong, flexible, lightweight aluminium based material, Lapjack folds flat and can be slipped into a briefcase or laptop bag. Used with a separate mouse and keyboard, Lapjack corrects the posture of laptop users and allows employers to fulfil their health and safety obligations.

## Ergonomic laptop stand Lapjack

Jellyfish is a stylish addition to a desk, whether at home or in the office. The organic moulded plastic design, available in a range of colours, can hold a laptop at one of three height settings to position the screen at eye level. Used with a separate mouse and keyboard, Jellyfish corrects the posture of laptop users and allows employers to fulfil their health and safety obligations.
